Directions: Review. Read and answer each question.

1. Use the numbers in the box to complete each number sentence.

| 250,000 | 0.52 | 52 | 10^4 | 10^3 | 24 |

A   _____ $\times 10^5$ = 5,200,000

B $520 \div 10^3$ = _____

C   _____ $\div 10^4$ = 0.0024

D $2.4 \times$ _____ = 24,000

2. Divide by decomposing the dividend using the place value strategy.

$$30 \overline{)\ 7050}$$

3. Write a number that has a 2 with a value 100 times less than the value of the 2 in the number 42,845.

Directions: Divide using the measuring up strategy.

4. Max has 1.32 yards of tape. If each project uses 0.33 yards of tape, how many projects can he complete?

5. John has 1.2 pounds of marshmallows to make candied yams for a holiday party. If the recipe calls for 0.4 pounds of marshmallows, how many batches of candied yams can he make?
