## Dear Second Grade Families,

In Unit 11, students will work on the following second grade Common Core standards in the Measurement and Data (MD) domain.

| 2.MD.1 | Measure the length of an object by selecting and using appropriate tools such as rulers, <br> yardsticks, meter sticks, and measuring tapes. |
| :---: | :--- |
| 2.MD.2 | Measure the length of an object twice, using length units of different lengths for the two <br> measurements; describe how the two measurements relate to the size of the unit chosen. |
| 2.MD.3 | Estimate lengths using units of inches, feet, centimeters, and meters. |
| 2.MD.4 | Measure to determine how much longer one object is than another, expressing the length <br> difference in terms of a standard length unit. |
| 2.MD.5 | Use addition and subtraction within 100 to solve word problems involving lengths that are <br> given in the same units, e.g., by using drawings (such as drawings of rulers) and equations <br> with a symbol for the unknown number to represent the problem. |
| 2.MD.6 | Represent whole numbers as lengths from 0 on a number line diagram with equally spaced <br> points corresponding to the numbers $0,1,2, \ldots$, and represent whole-number sums and <br> differences within 100 on a number line diagram. |

## Unit 11 Concepts:

- Choose an appropriate tool to measure length
- Measure \& estimate length (US Customary \& metric systems)
- Compare lengths
- Solve word problems

Unit 11 Vocabulary

- US Customary System

- Metric System
- Ruler
- Yardstick
- Meter stick
- Measuring tape
- Inch, foot, yard
- Centimeter, meter
- Estimate

## Need a review?

Have your student login to Swun Math to access lesson support videos.

Ask questions like these to help your child become a productive mathematical thinker:

- Let's measure the length of your pinky finger. What tool should we use? About how many inches long is it? About how many centimeters?
- What tool would we use to measure how wide a window is? Why is that the best choice?
- Without measuring, about how long do you think a spaghetti noodle is? How do you know your estimate is reasonable?
- How tall is a box of cereal in inches? How tall is it in centimeters? Measure the width in inches and centimeters.
- Measure the height of another box of cereal. How much taller is one than the other? What equation could you write to show the difference? Show me on a number line.

We encourage you to talk with your child daily about what was learned in math class.

Thank you for your support!
