## Dear Sixth Grade Families,

In Unit 5, students will work on the following sixth grade Common Core standards in the Expressions and Equations (EE) domain.

| 6.EE. 5 | Understand solving an equation or inequality equation. |
| :--- | :--- |
| 6.EE.6 | Use variables to represent numbers and write expressions. |
| 6.EE. 7 | Solve real-world and mathematical problems with illustrations. |
| 6.EE. 8 | Write an inequality and represent it on a number line. |
| 6.E.. 9 | Use variables to represent two quantities using a graph and formulas. |

## Unit 5 Concepts:

- Generate and solve expressions and equations (involving addition, subtraction, multiplication, division)
- Generate and solve equations with independent and dependent variables.
- Write, model, and find solutions for inequalities
- Graph inequalities on a number line

Unit 5 Vocabulary:

- Expression
- Equation
- Independent variable
- Dependent variable
- Inequality
<less than, fewer than
$>$ greater than, more than

$n$ does not include 1

Equation: a number sentence showing that two values are equal

$$
n \times 3=6
$$

Inverse operation: the operation that reverses the effect of another operation

Fact family: a group of numbers that form related equations

$$
\begin{array}{ll}
2 \times 3=6 & 6 \div 3=2 \\
3 \times 2=6 & 6 \div 2=3
\end{array}
$$

Scale model: both sides of the scale are equal in value

Tape-like diagram: each strip represents the values on each side of an equation

| 6 |  |
| :---: | :---: |
| $n$ | $n$ |

We encourage you to talk with your child daily about what was learned in math class.

Thank you for your support!
