

Dear Kindergarten Families,

In Unit 4, students will work on the following Kindergarten Common Core standard in the Measurement and Data (MD) domain.

K.MD.1	Classify objects into given categories; count the numbers of objects in each category and sort the categories by count.
--------	---

Students will need child-friendly scissors and glue to complete the homework for this unit. Students will cut out pictures, sort them into groups of the same objects, then glue them in place. Your child may need some assistance with using scissors.

Unit 4 Concepts:

- Sorting objects into categories
- Classifying objects into categories
- Counting objects in each category

Unit 4 Vocabulary:

- Sort
- Classify
- Count how many
- How many more?
- How many fewer?

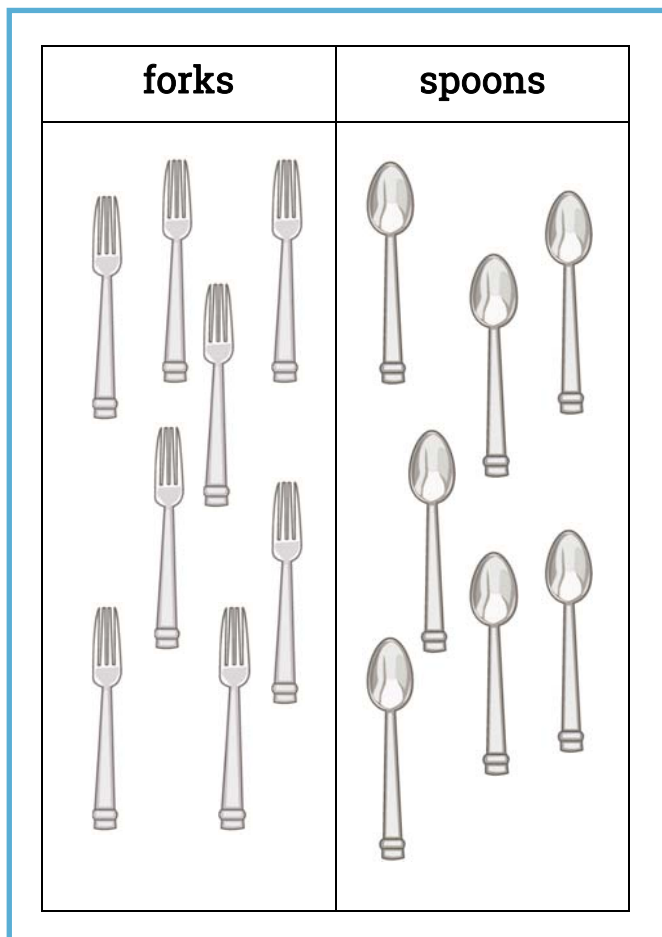

Ask questions like these to help your child become a productive mathematical thinker:

- When do we sort objects in real life?
- Help me sort the laundry into piles of darks lights.
- Please sort the spoons and forks in the drawer. How many spoons are there? How many forks?
- How many orange cubes are there?
- Which group has more? Which group has fewer?

If you don't know the class's special name, ask your child's teacher.

We encourage you to talk with your child daily about what was learned in math class.

Thank you for your support!
